| Year ending March 31, 2019 (Forecast) |                   |                    |                   | 19.00    | 70.00 |  |  |  |

(Note) Revision of dividend forecast that has been disclosed lastly: Yes

The Company carried out a consolidation of share at the ratio of 2 shares to 1 share on October 1, 2017. As the second quarter-end dividend for the fiscal year ended March 31, 2018 was paid based on the number of shares prior to the consolidation of share, the dividend per share is shown in the amount prior to the consolidation of share. The year-end dividend per share for the fiscal year ended March 31, 2018 is shown in the amount based on the said consolidation of share and the full-year dividend is shown as "—". The full-year dividend per share calculated on a post-consolidation of share basis is ¥100 for the year ended March 31, 2018.

# 3. Forecast of Consolidated Operating Results for the Year Ending March 31, 2019 (From April 1, 2018, to March 31, 2019)

(% figures show year-on-year change)

|           | Net sales       |      | Profit before tax |       | Profit attributable to owners of parent |       | Basic earnings per share |
|-----------|-----------------|------|-------------------|-------|---|-------|--------------------------|
|           | Millions of yen | %    | Millions of yen   | %     | Millions of yen                         | %     | Yen                      |
| Full year | 909,000         | -2.2 | 86,000            | -20.6 | 64,000                                  | -29.1 | 232.90                   |

(Note) Revision of operating results forecast that has been disclosed lastly: Yes

For further details, please refer to "1. Qualitative Information on Quarterly Financial Results, (3) Forward-Looking Information Including Forecast of Consolidated Operating Results and Other" on page 5.

# Notes

- (1) Change in Important Subsidiaries during the Period under Review (Change in specific subsidiaries that will accompany a change in scope of consolidation): None
- (2) Changes in Accounting Policies or Estimates
  - 1) Changes in accounting policies required by IFRS:

None

2) Changes in accounting policies other than item 1) above:

None

3) Change in accounting estimates:

None

- (3) Number of Outstanding Shares (Common stock)
  - 1) Number of shares issued as of end of period (including treasury stock)

290,814,015 shares at December 31, 2018

290,814,015 shares at March 31, 2018

2) Number of shares of treasury stock as of end of period

16,025,041 shares at December 31, 2018

16,020,099 shares at March 31, 2018

3) Average number of shares during the period

274,791,065 shares for nine months ended December 31, 2018

275,789,286 shares for nine months ended December 31, 2017

(Note) The Company carried out a consolidation of share at the ratio of 2 shares to 1 share on October 1, 2017. The number of shares issued as of end of period, number of shares of treasury stock as of end of period and average number of shares during the period have been calculated on the assumption that the said consolidation of share was carried out at the beginning of the previous fiscal year.

The consolidated financial results presented herein are not subject to the quarterly review by certified public accountants or audit corporations.

# Explanation regarding appropriate use of operating results forecast and other special notes

(Caution Regarding Forward-Looking Statements)

The forecast of consolidated operating results for the year ending March 31, 2019, disclosed on November 8, 2018, has been revised in this report. The forward-looking statements, including business results forecast, contained in these materials are based on information available to the Company and on certain assumptions deemed to be reasonable as of the date of release of this document and they are not meant to be a commitment by the Company. Also, actual business results may differ substantially due to a number of factors.

# (Supplementary Explanation Materials for Financial Results for the Period)

The Supplementary Explanation Materials will be posted on the Company's website on Friday, February 8, 2019.

# (Application of International Financial Reporting Standards (IFRS))

The SMM Group has voluntarily applied International Financial Reporting Standards (hereinafter, "IFRS") from the first quarter of the fiscal year ending March 31, 2019. In addition, financial figures for the same period in the previous fiscal year and for the previous fiscal year are shown in accordance with IFRS.

# 1. Qualitative Information on Quarterly Financial Results

The Sumitomo Metal Mining Group (hereinafter the "SMM Group") adopts International Financial Reporting Standards (IFRS) from the fiscal year ending March 31, 2019. Accordingly, financial figures for the first nine months of the previous fiscal year and those for the previous fiscal year are also presented in accordance with IFRS for year-on-year comparative analysis.

For information about the differences in financial figures between IFRS and Japanese accounting standards, please see "2. Condensed Quarterly Consolidated Financial Statements and Primary Notes, (5) Notes Relating to the Condensed Quarterly Consolidated Financial Statements (First-time Adoption)" on page 16 of the Attachment.

The global economy during the first nine months of fiscal 2018, the year ending March 31, 2019, generally continued to grow in each region, driven by the strong United States economy. However, concerns regarding an economic slowdown increased toward the end of the year.

As for exchange rates, the yen depreciated while the dollar appreciated, amid such factors as an interest rate differential between Japan and the United States. However, the average exchange rate remained flat year-on-year, as concerns regarding a global economic slowdown led to a worldwide decline in stock prices, and encouraged yen buying to avoid risk, thus halting further depreciation of the yen and appreciation of the dollar.

Regarding the prices of major nonferrous metals, prices of copper and nickel rose year-over-year in the first nine months of fiscal 2018, due to the impact of price increases in the first quarter, despite a year-on-year drop in gold prices. Since the second quarter of fiscal 2018, copper and nickel prices have shifted to a downward trend, as funds were withdrawn from the market due primarily to an escalation in trade friction between the United States and China, as well as monetary tightening by the United States.

In industries related to the Materials business, demand for automobile battery components continued to increase. Although the growth of the smartphone market slowed due to increased adoption and maturation of the market, the selling environment for electronic components for automotive and communication applications continued to be favorable, despite some trends toward inventory adjustment.

Under these circumstances, consolidated net sales in the first nine months of fiscal 2018 increased by \\ \pm 18,487 million from the same period of the previous fiscal year to \\ \pm 703,485 million, mainly due to increases in prices of copper and nickel, and increased sales of battery materials.

Consolidated profit before tax decreased by ¥5,374 million from the same period of the previous fiscal year to ¥86,697 million, due mainly to a deterioration in the share of profit (loss) of entities accounted for using equity method, despite increased earnings, increased finance income from foreign exchange gains, and increased profit due to the sale of Sumitomo Metal Mining Pogo LLC.

Profit attributable to owners of parent decreased by ¥506 million from the same period of the previous fiscal year to ¥66,867 million, due mainly to decreased profit before tax.

Operating results by segment are as follows.

(Mineral Resources segment)

(Millions of yen)

|                | Nine months ended<br>December 31, 2017 | Nine months ended<br>December 31, 2018 | Increase/decrease | Rate of change (%) |
|----------------|--|--|-------------------|--------------------|
| Net sales      | 113,782                                | 102,508                                | -11,274           | -9.9               |
| Segment income | 38,653                                 | 32,676                                 | -5,977            | -15.5              |

In the Mineral Resources segment, despite an increase in copper prices and posting of profit on the sale of Sumitomo Metal Mining Pogo LLC, segment income decreased from the same period of the previous fiscal year, due to a decrease in production at our main mines resulting from a drop in the grade of copper ore. In addition, royalties levied on mining companies for prior years at Sociedad Minera Cerro Verde S.A.A., which had been posted in the same period of the previous fiscal year, were recorded in the third quarter of fiscal 2018.

The statuses of our main mines are as follows.

Mining operations at the Hishikari mine remained steady in line with the planned annual sales amount of 6 t, and sales volume of gold was 4.4 t.

Production levels at the Morenci copper mine (United States) (of which the Company holds a 25% interest, excluding non-controlling interest) fell from the same period of the previous fiscal year to 328,000 t, due mainly to a drop in the grade of copper ore.

Production levels at the Cerro Verde copper mine (Peru) (of which the Company holds a 16.8% interest, excluding non-controlling interest) fell from the same period of the previous fiscal year to 356,000 t, due mainly to a drop in the grade of copper ore.

Despite having been forecast to be at the same level as the previous consolidated fiscal year due to a recovery in throughput and other factors, production levels at the Sierra Gorda copper mine (Chile) (of which the Company holds a 31.5% interest, excluding non-controlling interest) fell from the same period of the previous fiscal year to 69,000 t, due mainly to a drop in the grade of copper ore.

| Gold                     | kg             | 15,712                                 | 16,353                                 | 641               |
| Electrolytic nickel      | t              | 45,205                                 | 42,397                                 | -2,808            |
| Ferronickel              | t              | 9,949                                  | 9,996                                  | 47                |

Note: Output includes the portions of commissioning and/or commissioned production.

In the Smelting & Refining segment, segment income grew compared to the same period of the previous fiscal year, due mainly to the rise in nonferrous metal prices.

Production levels and sales volume of copper increased from the same period of the previous fiscal year. Although production levels at Coral Bay Nickel Corporation increased compared to the same period of the previous fiscal year, production levels at Taganito HPAL Nickel Corporation declined from the same period of the previous fiscal year, due mainly to equipment problems. As a result, production levels and sales volume of electrolytic nickel declined from the same period of the previous fiscal year.

|                   | As of March 31, 2018 | As of December 31,<br>2018 | Increase/decrease |
|-------------------|----------------------|----------------------------|-------------------|
| Total assets      | 1,732,333            | 1,751,288                  | 18,955            |
| Total liabilities | 618,984              | 603,581                    | -15,403           |
| Total equity      | 1,113,349            | 1,147,707                  | 34,358            |

Total assets as of December 31, 2018 increased from those as of March 31, 2018. The main changes are described below. Cash and cash equivalents, as well as trade and other receivables increased. Property, plant and equipment decreased, and investment securities included in other non-current financial assets also decreased due to a decline in stock prices.

Total liabilities as of December 31, 2018 decreased from those as of March 31, 2018. The main changes are described below. Trade and other payables increased. Bonds and borrowings decreased due to redemption and repayments, respectively. In addition, as a result of the sale of Sumitomo Metal Mining Pogo LLC, provisions such as asset retirement obligations recorded at that company decreased.

Total equity as of December 31, 2018 increased from those as of March 31, 2018. The main changes are described below. Retained earnings increased due to the recording of profit attributable to owners of parent. Financial assets measured at fair value through other comprehensive income included in other components of equity decreased due to a decline in stock prices.

| Net cash provided by operating activities                   | 51,631            | 106,999                             | 55,368            |  |  |  |  |
| Net cash provided by (used in) investing activities         | (9,600)           | (30,531)                            | -20,931           |  |  |  |  |
| Net cash used in financing activities                       | (42,933)          | (53,203)                            | -10,270           |  |  |  |  |
| Effect of exchange rate change on cash and cash equivalents | 3,732             | 1,323                               | -2,409            |  |  |  |  |
| Cash and cash equivalents at beginning of period            | 172,907           | 137,330                             | -35,577           |  |  |  |  |
| Cash and cash equivalents at end of period                  | 175,737           | 161,918                             | -13,819           |  |  |  |  |

Net cash provided by operating activities during the first nine months of fiscal 2018 increased year over year, due mainly to decreases in income taxes paid and inventories, despite a decrease in profit before tax.

Net cash used in investing activities increased from the same period of the previous fiscal year, due to an increase in purchase of property, plant and equipment, in addition to decreases in large income from collection of long-term loans receivable and proceeds from sales of investment securities that were recorded in the same period of the previous fiscal year, despite proceeds from the sale of Sumitomo Metal Mining Pogo LLC.

Net cash used in financing activities increased from the same period of the previous fiscal year, due to a large increase in cash dividends paid, in addition to the redemption of bonds that exceeded the issuance of bonds.

In the business environment surrounding the SMM Group, supply and demand of copper and nickel in the medium and long term are expected to remain in a near state of equilibrium or face a slight supply shortage in the nonferrous metals industry. Copper and nickel prices have been on a downward trend since the second quarter of fiscal 2018, and are expected to continue hovering in the short term. As for industries related to the Materials business, growth is expected in the areas of automotive applications and communications, despite the possibility of temporary adjustments.

The forecast of consolidated operating results for fiscal 2018 has been revised from the previous forecast (released on November 8, 2018), revising our forecast for major nonferrous metals prices, as well as our forecast for production levels and sales volumes of major products, based on current results. As a result, net sales are expected to reach \(\frac{1}{2}\)909.0 billion, profit before tax of \(\frac{1}{2}\)86.0 billion, and profit attributable to owners of parent of \(\frac{1}{2}\)46.0 billion on a consolidated basis.

(5) Notes Relating to the Condensed Quarterly Consolidated Financial Statements

(Note Relating to the Going Concern Assumption)

There are no pertinent items.

### (Operating Segments)

- (1) Summary of reportable segments
  - 1) Decision method of the reportable segments

The reportable segments of the Company refer to constitutional units, for which separate financial information is available and that are subject to periodic reviews by the Board of Directors as the supreme, managerial decision-making organ to determine the allocation of management resources and assess their respective operating results.

The Company currently has three business divisions—Mineral Resources Div., Non-Ferrous Metals Div., Materials Div.—in the pursuit of effective business operations by products and services. Each of these business divisions plans its own comprehensive strategies to be carried out in Japan and overseas for its own product and service lines and engages in diverse business activities within the Company and through the consolidated subsidiaries and equity-method affiliates over which it holds jurisdiction. The three aforementioned businesses are classified as "Operating Segments" of the Company. The SMM Group has classified these operating segments into three core reportable segments of Mineral Resources, Smelting & Refining, and Materials by integrating the mineral resource businesses into Mineral Resources, the metals businesses into Smelting & Refining, and materials businesses into Materials.

# 2) Types of products and services that belong to each reportable segment

In the Mineral Resources segment, the SMM Group mainly engages in the exploration, development and production of nonferrous metal resources in Japan and overseas, as well as sales of ores and products.

In the Smelting & Refining segment, the SMM Group mainly engages in smelting and sales of copper, nickel, ferronickel and zinc, etc., as well as smelting and sales of precious metals such as gold, silver and platinum.

In the Materials segment, the Company mainly engages in manufacturing, processing and sales of semiconductor materials including tape materials, advanced materials including pastes, powder materials (e.g., nickel powder), battery materials (e.g., nickel hydroxide, lithium nickel oxide) and crystal materials (e.g., lithium tantalate substrates, lithium niobate substrates); and manufacturing and sales of automotive exhaust processing catalysts, chemical catalysts, petroleum refinery and desulfurization catalysts and autoclaved lightweight concrete (ALC) products.

# (2) Calculation methods of net sales and income (loss) by reportable segments

The accounting methods employed for the reported operating segments are almost the same as the accounting policies for the creation of Condensed Quarterly Consolidated Financial Statements, with the exception of the reporting by each reported segment of amounts corresponding to interest on internal loans, as determined in the statement of financial position of each segment.

The inter-segment net sales are calculated based on arm's length transaction prices.

- 3. Segment income (loss) is adjusted against the profit before tax on the Condensed Quarterly Consolidated Statement of Income.

### (First-time Adoption)

The SMM Group has started to disclose IFRS-compliant Condensed Quarterly Consolidated Financial Statements from the first quarter of the fiscal year ending March 31, 2019. The latest J-GAAP-compliant consolidated financial statements were prepared for the fiscal year ended March 31, 2018, and the transition date to IFRS was April 1, 2017.

### (1) Exemption under IFRS 1

A company adopting IFRS for the first time (hereinafter "first-time adopter") is required to apply the standards imposed under IFRS on a retroactive basis, provided, however, that IFRS 1 "First-time Adoption of International Financial Reporting Standards" (hereinafter "IFRS 1") defines standards subjected to mandatory application of exemption (from the aforementioned retroactive application), in contrast to those subjected to optional application of exemption. Impacts from the application of these exemptions are adjusted by retained earnings, or other components of equity on the date of transition to IFRS. In the process of transition to IFRS from J-GAAP, the SMM Group applied the following exemptions.

# - Business combinations

A first-time adopter is allowed to opt not to retroactively apply IFRS 3 "Business Combinations" (hereinafter the "IFRS 3") to the business combinations that took place before the date of transition to IFRS. The SMM Group opted, by applying this exemption, not to retroactively apply IFRS 3 to the business combinations that took place before the date of transition. As a result, the amount of goodwill arising from the business combinations prior to the transition date is recognized at carrying amount at the transition date based on the J-GAAP

Incidentally, goodwill is subjected to impairment test on the transition date, regardless of whether there is an indication of impairment.

# - Exchange differences on foreign operations

Under IFRS 1, entities are allowed to opt for an approach whereby it may assume the cumulative amount of exchange differences on foreign operations at the date of transition to IFRS to be zero. The SMM Group opted for assuming such cumulative exchange differences on foreign operations to be zero at the transition date.

#### - Leases

IFRS 1 allows a first-time adopter to determine whether a contract contains a lease at the date of transition to IFRS. The SMM Group applied this exemption and determined whether contracts contain lease, based on the facts and circumstance existing at the transition date.

# - Decommissioning liabilities included in the cost of property, plant and equipment

With respect to the measurement of liabilities associated with decommissioning, etc. (hereinafter "decommissioning liabilities") which are included in the cost of property, plant and equipment, IFRS 1 allows entities to choose either a method in which decommissioning liabilities are measured retroactively from the point in time when such liabilities first arose, or a method in which decommissioning liabilities are measured at the transition date. The SMM Group opted for the latter in measuring decommissioning liabilities which are included in the cost of property, plant and equipment.

# - Borrowing costs

IFRS 1 allows entities to commence capitalizing the borrowing costs associated with qualifying assets on the date of the transition to IFRS. The SMM Group capitalizes the borrowing costs associated with qualifying assets that arise on or after the transition date.

# - Designation of previously recognized financial instruments

With respect to classification in IFRS 9 "Financial Instruments" (hereinafter the "IFRS 9"), IFRS 1 allows entities to determine such classification based on the facts and circumstance existing at the transition date, rather than those existing at the initial recognition. Furthermore, it allows entities to designate changes in fair value of equity instruments as financial assets measured through other comprehensive income, subject to the facts and circumstance existing at the transition date.

The SMM Group determines the classification under IFRS 9, based on the facts and circumstance existing at the transition date, while designating equity instruments as financial assets measured through other comprehensive income.

#### (2) Mandatory exemption under IFRS 1

IFRS 1 prohibits retroactive application of IFRS with respect to "estimates," "derecognition of financial assets and financial liabilities," "hedge accounting," "non-controlling interests," and "classification and measurement of financial assets." Thus the SMM Group applies IFRS with respect to these items for the period subsequent to the transition date.

# (3) Reconciliation

The reconciliation required to disclose at the first-time adoption of IFRS is as follows.

"Effects of changes in closing dates" in this reconciliation include effects of the changes under IFRS at consolidated subsidiaries adopting different closing dates. In the meantime, "reclassification" includes items that have no effects on retained earnings and comprehensive income, while "difference in recognition and measurement" includes items that have effects on retained earnings and comprehensive income.

# Reconciliation of equity as of April 1, 2017 (transition date)

| Line items presented under J-GAAP                | J-GAAP             | Effects of changes in closing dates | Reclassification   | Difference in recognition and measurement | IFRS             | Notes    | Line items presented under IFRS                  |

< Notes to the reconciliation of equity at the date of transition to IFRS (as of April 1, 2017)>

A) Cash and cash equivalents, trade and other receivables, other financial assets, inventories, other current assets, and assets held for sale

#### Reclassification:

Term deposits with over three months maturity which were included in "cash and deposits" under J-GAAP are reclassified into "other financial assets" (current) under IFRS, while negotiable certificates of deposit that were included in "securities" under J-GAAP have been reclassified as "cash and cash equivalents" under IFRS.

Accounts receivable – other which were included in "other" under J-GAAP have been reclassified into "trade and other receivables" under IFRS, while "allowance for doubtful accounts" (current) which were also included in "other" under J-GAAP, is directly deducted from "trade and other receivables" under IFRS.

Assets of subsidiaries covered under the stock purchase and sale agreement valid at the transition date have been reclassified into "assets held for sale."

# Recognition and measurement:

# [Trade and other receivables]

Under J-GAAP, revenue from some of the transactions of sales of goods was recognized upon customer acceptance, while under IFRS, it is recognized at the time when control over the goods is transferred. As a result, "trade and other receivables" increased by  $\frac{1}{2}$ , 120 million.

### [Inventories and other current assets]

Under J-GAAP, some of the raw materials were recognized based on customer acceptance criteria, while under IFRS, they are recognized at the time when control over the goods is acquired. As a result, "inventories" increased by \(\frac{\pmaterial}{37,659}\) million. Following the above change, advance payments for such raw materials were offset by "trade and other payables," resulting in \(\frac{\pmaterial}{17,052}\) million decrease in "other current assets."

# B) Property, plant and equipment, and investment property

### Reclassification:

"Investment property" that was presented under J-GAAP in "property, plant and equipment" has been reclassified to be presented separately on its own.

# Recognition and measurement:

# [Property, plant and equipment]

Under J-GAAP, asset retirement obligations were recognized continuously at an amount measured by using the discount rate used at initial recognition, whereas under IFRS such amount was remeasured by using the discount rate adjusted at the end of the reporting period, resulting in ¥1,853 million increase in "property, plant and equipment."

# C) Investments accounted for using equity method, other financial assets, and deferred tax assets Reclassification:

Shares of subsidiaries and associates that were included in "investment securities" under J-GAAP have been separately presented as "investments accounted for using equity method" under IFRS, while "investment securities" other than the aforementioned, and long-term accounts receivables that were included in "other" (non-current) under J-GAAP have been reclassified into "other financial assets" (non-current) under IFRS. "Long-term loans receivable," etc. under J-GAAP have been reclassified into "other financial assets" (non-current) under IFRS, while "allowance for doubtful accounts" (non-current) under J-GAAP is directly deducted from "other financial assets" (non-current) under IFRS. Meanwhile, an amount presented as "deferred tax assets" (current) has been reclassified as "deferred tax assets" (non-current) under IFRS.

# Recognition and measurement:

# [Other financial assets]

Financial instruments such as unlisted shares considered to pose extreme difficulty in determining fair value were recognized at cost under J-GAAP, whereas fair value of such financial instruments is estimated by using appropriate valuation techniques under IFRS, resulting in ¥6,174 million increase in "other financial assets" (non-current).

# D) Trade and other payables, other financial liabilities, provisions, and liabilities directly associated with assets held for sale

# Reclassification:

Accounts payable and accrued expenses, etc. that were presented in "other" under J-GAAP have been reclassified into "trade and other payables" under IFRS, while "provision for bonuses" and "other provision" (current) that were presented separately in current liabilities under J-GAAP have been reclassified into "provisions" (current) under IFRS.

Liabilities directly associated with assets of subsidiaries covered under the stock purchase and sale agreement valid at the transition date have been reclassified into "liabilities directly associated with assets held for sale."

### Recognition and measurement:

# [Trade and other payables]

Under J-GAAP, some of the raw materials were recognized based on customer acceptance criteria, while under IFRS they are recognized at the time when control over the goods is acquired. Also fixed asset tax, which under J-GAAP was recognized over the fiscal years in which such tax was paid, started to be wholly charged to expense on the base date for assessment under IFRS, while corresponding liabilities are recognized. As a result of the aforementioned, "trade and other payables" increased by \(\frac{1}{2}\)1,637 million.

### [Provision for furnace repair works]

"Provision for furnace repair works" which was recognized as a provision under J-GAAP has been reversed for not qualifying for provision under IFRS, resulting in ¥1,117 million decrease in such provision.

### [Other financial liabilities]

Some of the financial instruments (specifically forward sales agreement) which were subjected to hedge accounting under J-GAAP started to be subjected to fair value option under IFRS with its futures portion valued at fair value, resulting in \(\frac{1}{2}\),234 million increase in "other financial liabilities."

# [Provisions]

Unused paid leave for which no provision was recognized under J-GAAP started to be treated as labor cost involving recognition of provision under IFRS, resulting in ¥524 million increase in "provisions" (current).

# E) Bonds and borrowings, deferred tax liabilities, provisions and other financial liabilities Reclassification:

"Bonds payable" and "long-term loans payable" under J-GAAP have been combined into "bonds and borrowings" (non-current) under IFRS, while provisions such as "provision for loss on business restructuring" and "allowance for decommissioning preparations" as well as "asset retirement obligations" under J-GAAP have been reclassified into "provisions" (non-current) under IFRS. Meanwhile, "deferred tax liabilities" (current) under J-GAAP have been reclassified as "deferred tax liabilities" (non-current) under IFRS.

# Recognition and measurement:

# [Bonds and borrowings]

Loans with share acquisition rights classified as "long-term loans payable" under J-GAAP are treated under IFRS as compound financial instruments, part of which being recognized in "retained earnings," resulting in \(\frac{4}{3}\)2,634 million decrease in "bonds and borrowings" (non-current).

# [Deferred tax liabilities]

Since deferred tax liabilities started to be recognized in principle under IFRS for the taxable temporary differences arising from retained profits and foreign currency translation adjustment at affiliates, "deferred tax liabilities" (non-current) increased by ¥8,545 million.

# [Provisions]

Under J-GAAP, asset retirement obligations were recognized continuously at an amount measured by using the discount rate used at initial recognition, whereas under IFRS such amount was remeasured by using the discount rate adjusted at the end of the reporting period, resulting in ¥4,009 million increase in "provisions" (non-current).

# [Other financial liabilities]

For the leasing arrangements that did not take legal forms under J-GAAP, those effectively considered as leasing arrangement have started to involve recognition of lease obligations under IFRS, resulting in ¥948 million increase in "other financial liabilities" (non-current).

# F) Retained earnings, and other components of equity

Recognition and measurement:

Main items of the reconciliation concerning retained earnings are as follows.

|   | Date of transition to IFRS |
|---|----------------------------|
|   | (As of April 1, 2017)      |
|   | Millions of yen            |
| Reclassification of cumulative exchange differences at foreign subsidiaries | 57,272                     |
| Adjustment of trade receivables and inventories                             | 1,799                      |
| Adjustment to compound financial instruments                                | 1,599                      |
| Adjustment by tax effect  | (6,531)                    |
| Adjustment to asset retirement obligations                                  | (1,509)                    |
| Adjustment to liabilities on levies   | (1,338)                    |
| Other   | (952)                      |
| Total   | 50.340                     |

# [Reclassification of cumulative exchange differences at foreign subsidiaries]

As IFRS 1 allows entities to assume the cumulative exchange differences associated with investments in foreign operations to be zero at the date of transition to IFRS, such cumulative exchange differences were reclassified at the date of transition to IFRS from "other components of equity" into "retained earnings." As a result, "other components of equity" decreased by \frac{\pmathbf{4}}{57,272} million, while "retained earnings" increased by the same amount.

# [Adjustment of trade receivables and inventories]

As IFRS requires use of the same cost formula for all inventories with similar nature and use, it was necessary to change cost formula for part of inventories, resulting in \(\frac{1}{2}\)1,799 million increase in "retained earnings."

# [Adjustment to compound financial instruments]

As IFRS requires compound financial instruments to be classified into liabilities and equity as basis for further accounting treatment, some compound financial instruments started to be treated as "retained earnings," resulting in \(\frac{\pmathbf{1}}{2}\),599 million increase in "retained earnings."

#### [Adjustment by tax effect]

Since deferred tax liabilities started to be recognized in principle under IFRS for the taxable temporary differences arising from retained profits at affiliates, "retained earnings" decreased by ¥6,531 million.

# [Adjustment to asset retirement obligations]

Under J-GAAP, asset retirement obligations were recognized continuously at an amount measured by using the discount rate used at initial recognition, whereas under IFRS such amount was remeasured by using the discount rate adjusted at the end of the reporting period, resulting in ¥1,509 million decrease in "retained earnings."

# [Adjustment to liabilities on levies]

Fixed asset tax, which under J-GAAP was recognized over the fiscal years in which such tax was paid, started to be wholly charged to expense on the base date for assessment under IFRS, while corresponding liabilities are recognized. As a result, "retained earnings" decreased by \footnote{1},338 million.

# Reconciliation of equity as of December 31, 2017 (at the end of the third quarter of the previous fiscal year)

< Notes to the reconciliation of equity for the third quarter of the previous fiscal year (as of December 31, 2017)>

A) Cash and cash equivalents, trade and other receivables, other financial assets, inventories, and other current assets

#### Reclassification:

Term deposits with over three months maturity which were included in "cash and deposits" under J-GAAP, are reclassified into "other financial assets" (current) under IFRS, while negotiable certificates of deposit that were included in "securities" under J-GAAP have been reclassified as "cash and cash equivalents" under IFRS.

Accounts receivable – other which were included in "other" under J-GAAP have been reclassified into "trade and other receivables" under IFRS, while "allowance for doubtful accounts" (current) which were also included in "other" under J-GAAP, is directly deducted from "trade and other receivables" under IFRS.

### Recognition and measurement:

# [Trade and other receivables]

Revenue from some of the transactions of sales of goods which was recognized on a delivery basis under J-GAAP, is recognized at the time when control over the goods is transferred under IFRS, resulting in ¥145 million decrease in "trade and other receivables."

# [Inventories and other current assets]

Under J-GAAP, some of the raw materials were recognized based on customer acceptance criteria, while under IFRS, they are recognized at the time when control over the goods is acquired. As a result, "inventories" increased by \frac{\pmaterial}{53,519}\$ million. Following the above change, advance payments for such raw materials were offset by "trade and other payables," resulting in \frac{\pmaterial}{19,637}\$ million decrease in "other current assets."

# B) Property, plant and equipment, and investment property

### Reclassification:

"Investment property" that was presented under J-GAAP in "property, plant and equipment" has been reclassified to be presented separately on its own.

### Recognition and measurement:

# [Property, plant and equipment]

Under J-GAAP, asset retirement obligations were recognized continuously at an amount measured by using the discount rate used at initial recognition, whereas under IFRS such amount was remeasured by using the discount rate adjusted at the end of the reporting period, resulting in \(\frac{4}{2}\),164 million increase in "property, plant and equipment."

# C) Investments accounted for using equity method, other financial assets, and deferred tax assets Reclassification:

Shares of subsidiaries and associates that were included in "investment securities" under J-GAAP have been separately presented as "investments accounted for using equity method" under IFRS, while "investment securities" other than the aforementioned, and long-term accounts receivables that were included in "other" (non-current) under J-GAAP have been reclassified into "other financial assets" (non-current) under IFRS. "Long-term loans receivable," etc. under J-GAAP have been reclassified into "other financial assets" (non-current) under IFRS, while "allowance for doubtful accounts" (non-current) under J-GAAP is directly deducted from "other financial assets" (non-current) under IFRS. Meanwhile, an amount presented as "deferred tax assets" (current) has been reclassified as "deferred tax assets" (non-current) under IFRS.

# Recognition and measurement:

# [Other financial assets]

Financial instruments such as unlisted shares considered to pose extreme difficulty in determining fair value were recognized at cost under J-GAAP, whereas fair value of such financial instruments is estimated by using appropriate valuation techniques under IFRS, resulting in ¥4,378 million increase in "other financial assets" (non-current).

# D) Trade and other payables, income taxes payable, other financial liabilities, and provisions Reclassification:

Accounts payable and accrued expenses, etc. that were presented in "other" under J-GAAP have been reclassified into "trade and other payables" under IFRS, while "provision for bonuses" and "other provision" (current) that were presented separately in current liabilities under J-GAAP have been reclassified into "provisions" (current) under IFRS.

# Recognition and measurement:

# [Trade and other payables]

Under J-GAAP, some of the raw materials were recognized based on customer acceptance criteria, while under IFRS they are recognized at the time when control over the goods is acquired. Also fixed asset tax, which under J-GAAP was recognized over the fiscal years in which such tax was paid, started to be wholly charged to expense on the base date for assessment under IFRS, while corresponding liabilities are recognized. As a result of the aforementioned, "trade and other payables" increased by \(\frac{4}{2}\)8,201 million.

# [Income taxes payable]

Under J-GAAP, income tax was recognized using the principle method while under IFRS, it is recognized using the estimated average effective tax rate, resulting in ¥3,266 million decrease in "income taxes payable."

# [Other financial liabilities]

Some of the financial instruments (specifically forward sales agreement) which were subjected to hedge accounting under J-GAAP started to be subjected to fair value option under IFRS with its futures portion valued at fair value, resulting in \(\frac{1}{2}\),209 million increase in "other financial liabilities."

# [Provisions]

Unused paid leave for which no provision was recognized under J-GAAP started to be treated as labor cost involving recognition of provision under IFRS, resulting in ¥534 million increase in "provisions" (current).

# E) Bonds and borrowings, deferred tax liabilities, provisions, and other financial liabilities Reclassification:

"Short-term loans payable" and "current portion of bonds" under J-GAAP have been combined into "bonds and borrowings" (current) under IFRS, while "bonds payable" and "long-term loans payable" under J-GAAP have been combined into "bonds and borrowings" (non-current) under IFRS. Provisions such as "provision for loss on business restructuring" and "allowance for decommissioning preparations" as well as "asset retirement obligations" under J-GAAP have been reclassified into "provisions" (non-current) under IFRS. Meanwhile, "deferred tax liabilities" (current) under J-GAAP have been reclassified as "deferred tax liabilities" (non-current) under IFRS.

# Recognition and measurement

### [Bonds and borrowings]

Loans with share acquisition rights classified as "long-term loans payable" under J-GAAP are treated under IFRS as compound financial instruments, part of which being recognized in "retained earnings," resulting in \(\frac{4}{2}2,221 million decrease in "bonds and borrowings" (non-current).

# [Deferred tax liabilities]

Since deferred tax liabilities started to be recognized in principle under IFRS for the taxable temporary differences arising from retained profits and foreign currency translation adjustment at affiliates, "deferred tax liabilities" (non-current) increased by ¥9,688 million.

# [Provisions]

Under J-GAAP, asset retirement obligations were recognized continuously at an amount measured by using the discount rate used at initial recognition, whereas under IFRS such amount was remeasured by using the discount rate adjusted at the end of the reporting period, resulting in ¥3,924 million increase in "provisions" (non-current).

# [Other financial liabilities]

For the leasing arrangements that did not take legal forms under J-GAAP, those effectively considered as leasing arrangement have started to involve recognition of lease obligations under IFRS, resulting in ¥1,308 million increase in "other financial liabilities" (non-current).

# F) Retained earnings, and other components of equity

# Recognition and measurement

Main items of the reconciliation concerning retained earnings are as follows.

|   | The third quarter of the previous fiscal year |
|---|---|
|   | (As of December 31,                           |
|   | 2017)   |
|   | Millions of yen                               |
| Reclassification of cumulative exchange differences at foreign subsidiaries | 57,272  |
| Adjustment of trade receivables and inventories                             | 1,678   |
| Adjustment to compound financial instruments                                | 1,353   |
| Adjustment by tax effect  | (6,714)                                       |
| Adjustment to asset retirement obligations                                  | (1,801)                                       |
| Other   | (193)   |
| Total   | 51,595  |

[Reclassification of cumulative exchange differences at foreign subsidiaries]

As IFRS 1 allows entities to assume the cumulative exchange differences associated with investments in foreign operations to be zero at the date of transition to IFRS, such cumulative exchange differences were reclassified at the date of transition to IFRS from "other components of equity" into "retained earnings." As a result, "other components of equity" decreased by ¥57,272 million, while "retained earnings" increased by the same amount.

[Adjustment of trade receivables and inventories]

As IFRS requires use of the same cost formula for all inventories with similar nature and use, it was necessary to change cost formula for part of inventories, resulting in \(\frac{\pma}{1}\),678 million increase in "retained earnings."

[Adjustment to compound financial instruments]

As IFRS requires compound financial instruments to be classified into liabilities and equity as basis for further accounting treatment, some compound financial instruments started to be treated as "retained earnings," resulting in \(\frac{1}{2}\),353 million increase in "retained earnings."

[Adjustment by tax effect]

Since deferred tax liabilities started to be recognized in principle under IFRS for the taxable temporary differences arising from retained profits at affiliates, "retained earnings" decreased by ¥6,714 million.

[Adjustment to asset retirement obligations]

Under J-GAAP, asset retirement obligations were recognized continuously at an amount measured by using the discount rate used at initial recognition, whereas under IFRS such amount was remeasured by using the discount rate adjusted at the end of the reporting period, resulting in \(\frac{1}{2}1,801\) million decrease in "retained earnings."

- < Notes to the reconciliation of equity for the previous fiscal year (as of March 31, 2018)>
- A) Cash and cash equivalents, trade and other receivables, other financial assets, inventories, and other current assets

#### Reclassification:

Term deposits with over three months maturity which were included in "cash and deposits" under J-GAAP, are reclassified into "other financial assets (current)" under IFRS, while negotiable certificates of deposit that were included in "securities" under J-GAAP have been reclassified as "cash and cash equivalents" under IFRS.

Accounts receivable – other which were included in "other" under J-GAAP have been reclassified into "trade and other receivables" under IFRS, while "allowance for doubtful accounts" (current) which were also included in "other" under J-GAAP, is directly deducted from "trade and other receivables" under IFRS.

# Recognition and measurement:

# [Trade and other receivables]

Revenue from some of the transactions of sales of goods which was recognized on a delivery basis under J-GAAP, is recognized at the time when control over the goods is transferred under IFRS, resulting in ¥488 million decrease in "trade and other receivables."

# [Inventories and other current assets]

Under J-GAAP, some of the raw materials were recognized based on customer acceptance criteria, while under IFRS, they are recognized at the time when control over the goods is transferred. As a result, "inventories" increased by ¥44,755 million. Following the above change, advance payments for such raw materials were offset by "trade and other payables," resulting in ¥16,188 million decrease in "other current assets."

# B) Property, plant and equipment, and investment property

### Reclassification:

"Investment property" that was presented under J-GAAP in "property, plant and equipment" has been reclassified to be presented separately on its own.

### Recognition and measurement:

# [Property, plant and equipment]

Under J-GAAP, asset retirement obligations were recognized continuously at an amount measured by using the discount rate used at initial recognition, whereas under IFRS such amount was remeasured by using the discount rate adjusted at the end of the reporting period, resulting in \(\frac{4}{2}\),629 million increase in "property, plant and equipment."

# C) Investments accounted for using equity method, other financial assets, and deferred tax assets Reclassification:

Shares of subsidiaries and associates that were included in "investment securities" under J-GAAP, have been separately presented as "investments accounted for using equity method" under IFRS, while "investment securities" other than the aforementioned, and long-term accounts receivables that were included in "other" (non-current) under J-GAAP have been reclassified into "other financial assets" (non-current) under IFRS. "Long-term loans receivable," etc. under J-GAAP have been reclassified into "other financial assets" (non-current) under IFRS, while "allowance for doubtful accounts" (non-current) under J-GAAP is directly deducted from "other financial assets" (non-current) under IFRS. Meanwhile, an amount presented as "deferred tax assets" (current) has been reclassified as "deferred tax assets" (non-current) under IFRS.

# Recognition and measurement:

# [Other financial assets]

Financial instruments such as unlisted shares considered to pose extreme difficulty in determining fair value were recognized at cost under J-GAAP, whereas fair value of such financial instruments is estimated by using appropriate valuation techniques under IFRS, resulting in ¥4,575 million increase in "other financial assets" (non-current).

# D) Trade and other payables, and provisions

### Reclassification:

Accounts payable and accrued expenses, etc. that were presented in "other" under J-GAAP, have been reclassified into "trade and other payables" under IFRS, while "provision for bonuses" and "other provision" (current) that were presented separately in current liabilities under J-GAAP have been reclassified into "provisions" (current) under IFRS.

#### Recognition and measurement:

# [Trade and other payables]

Under J-GAAP, some of the raw materials were recognized based on customer acceptance criteria, while under IFRS they are recognized at the time when control over the goods is acquired. Also fixed asset tax, which under J-GAAP was recognized over the fiscal years in which such tax was paid, started to be wholly charged to expense on the base date for assessment under IFRS, while corresponding liabilities are recognized. As a result of the aforementioned, "trade and other payables" increased by \(\frac{4}{2}4,086\) million.

#### [Provisions]

Unused paid leave for which no provision was recognized under J-GAAP started to be treated as labor cost involving recognition of provision under IFRS, resulting in ¥520 million increase in "provisions" (current).

# E) Bonds and borrowings, deferred tax liabilities, provisions and other financial liabilities Reclassification:

"Short-term loans payable" and "current portion of bonds" under J-GAAP have been combined into "bonds and borrowings" (current) under IFRS, while "bonds payable" and "long-term loans payable" under J-GAAP have been combined into "bonds and borrowings" (non-current) under IFRS. Provisions such as "provision for loss on business restructuring" and "allowance for decommissioning preparations" as well as "asset retirement obligations" under J-GAAP have been reclassified into "provisions" (non-current) under IFRS. Meanwhile, "deferred tax liabilities" (current) under J-GAAP have been reclassified as "deferred tax liabilities" (non-current) under IFRS.

### Recognition and measurement

# [Bonds and borrowings]

Convertible bond-type bonds with share acquisition rights included in "bonds payable" under J-GAAP are treated under IFRS as compound financial instruments, and partially recognized in "share premium," resulting in \(\frac{\pma}{1},298\) million decrease in "bonds and borrowings" (non-current).

# [Deferred tax liabilities]

Since deferred tax liabilities started to be recognized under IFRS for the whole amount of taxable temporary differences arising from retained profits and foreign currency translation adjustment at affiliates, "deferred tax liabilities" (non-current) increased by ¥11,868 million.

### [Provisions]

Under J-GAAP, asset retirement obligations were recognized continuously at an amount measured by using the discount rate used at initial recognition, whereas under IFRS such amount was remeasured by using the discount rate adjusted at the end of the reporting period, resulting in ¥4,324 million increase in "provisions" (non-current).

# [Other financial liabilities]

For the leasing arrangements that did not take legal forms under J-GAAP, those effectively considered as leasing arrangement have started to involve recognition of lease obligations under IFRS, resulting in ¥1,154 million increase in "other financial liabilities" (non-current).

# F) Retained earnings, and other components of equity

# Recognition and measurement

Main items of the reconciliation concerning retained earnings are as follows.

|   | Previous fiscal year ended |
|---|----------------------------|
|   | March 31, 2018             |
|   | (As of March 31, 2018)     |
|   | Millions of yen            |
| Reclassification of cumulative exchange differences at foreign subsidiaries | 57,272                     |
| Adjustment of trade receivables and inventories                             | 5,190                      |
| Adjustment to remeasurements of defined benefit plans                       | 2,500                      |
| Adjustment by tax effect  | (10,724)                   |
| Adjustment to asset retirement obligations                                  | (1,776)                    |
| Adjustment to liabilities on levies   | (1,345)                    |
| Other   | (591)                      |
| Total   | 50,526                     |

### [Reclassification of cumulative exchange differences at foreign subsidiaries]

As IFRS 1 allows entities to assume the cumulative exchange differences associated with investments in foreign operations to be zero at the date of transition to IFRS, such cumulative exchange differences were reclassified at the date of transition to IFRS from "other components of equity" into "retained earnings." As a result, "other components of equity" decreased by \frac{\pmathbf{4}57,272}{5} million, while "retained earnings" increased by the same amount.

[Adjustment of trade receivables and inventories]

As IFRS requires use of the same cost formula for all inventories with similar nature and use, it was necessary to change cost formula for part of inventories, resulting in ¥5,190 million increase in "retained earnings."

# [Adjustment to remeasurements of defined benefit plans]

Actuarial gains and losses under J-GAAP were recognized in other comprehensive income at the time of occurrence, and then were evenly amortized over the period within the average remaining years of service of the eligible employees from the fiscal year following such occurrence, whereas under IFRS, actuarial gains and losses are recognized in other comprehensive income at the time of occurrence, and then immediately recognized in "retained earnings," resulting in ¥2,500 million increase in "retained earnings."

### [Adjustment by tax effect]

Since deferred tax liabilities started to be recognized in principle under IFRS for the taxable temporary differences arising from retained profits at affiliates, "retained earnings" decreased by \tilde{\text{\text{10}}},724 million.

# [Adjustment to asset retirement obligations]

Under J-GAAP, asset retirement obligations were recognized continuously at an amount measured by using the discount rate used at initial recognition, whereas under IFRS such amount was remeasured by using the discount rate adjusted at the end of the reporting period, resulting in \(\frac{1}{4}1,776\) million decrease in "retained earnings."

# [Adjustment to liabilities on levies]

Fixed asset tax, which under J-GAAP was recognized over the fiscal years in which such tax was paid, started to be wholly charged to expense on the base date for assessment under IFRS, while corresponding liabilities are recognized. As a result, "retained earnings" decreased by \mathbb{\pmathbb{\frac{1}{3}}}1,345 million.

# Reconciliation to profit or loss and other comprehensive income for the nine months ended December 31, 2017 in the previous fiscal year (from April 1, 2017 to December 31, 2017)

### A) Net sales and cost of sales

# Recognition and measurement:

Revenue from some of the transactions of sales of goods which was recognized on a delivery basis under J-GAAP, is recognized at the time when control over the goods is transferred under IFRS, resulting in \(\frac{4}{2},243\) million decrease in "net sales." For the similar reason coupled with a change in cost formula, "cost of sales" decreased by \(\frac{4}{3},490\) million.

B) Other income, other expenses, finance income, finance costs, share of profit (loss) of entities accounted for using equity method, and income tax expense

### Reclassification:

Of the items presented in "non-operating income," "non-operating expenses," "extraordinary income," and "extraordinary losses" under J-GAAP, those concerning profit or loss related to finance are reclassified into "finance income" and "finance costs," while all other items into "other income," "other expenses," and "share of profit (loss) of entities accounted for using equity method" under IFRS. Meanwhile, "income taxes – current," and "income taxes – deferred" that were separately presented under J-GAAP are now wholly presented in "income tax expense" under IFRS.

### Recognition and measurement:

[Income tax expense]

Under J-GAAP, income tax was recognized using the principle method while under IFRS, it is recognized using the estimated average effective tax rate, resulting in \(\frac{4}{2}\)8 million increase in "income tax expense."

# C) Other comprehensive income, net of tax

Recognition and measurement:

[Financial assets measured at fair value through other comprehensive income]

Financial instruments such as unlisted shares considered to pose extreme difficulty in determining fair value were recognized at cost under J-GAAP, whereas fair value of such financial instruments is estimated by using appropriate valuation techniques under IFRS, resulting in ¥1,708 million decrease in "financial assets measured at fair value through other comprehensive income."

# [Remeasurements of defined benefit plans]

Actuarial gains and losses under J-GAAP were recognized in "other comprehensive income" at the time of occurrence, and then were evenly amortized over the period within the average remaining years of service of the eligible employees from the fiscal year following such occurrence, whereas under IFRS, actuarial gains and losses are recognized in "other comprehensive income" at the time of occurrence, and then immediately recognized in "retained earnings," resulting in ¥694 million decrease in "remeasurements of defined benefit plans."

### [Cash flow hedges]

Derivatives that met the hedge accounting requirements were recognized by deferred hedge accounting under J-GAAP, whereas some of such derivatives are subjected to fair value hedge accounting under IFRS, resulting in \(\frac{\pma}{1},791\) million increase in "cash flow hedges."

# Reconciliation to profit or loss and other comprehensive income for the previous fiscal year (from April 1, 2017 to March 31, 2018)

### A) Net sales and cost of sales

#### Reclassification:

Impairment loss presented in "extraordinary losses" under J-GAAP has been reclassified in "cost of sales" under IFRS.

# Recognition and measurement:

Revenue from some of the transactions of sales of goods which was recognized on a delivery basis under J-GAAP, is recognized at the time when control over the goods is transferred under IFRS, resulting in \(\frac{4}{2},583\) million decrease in "net sales." For the similar reason coupled with a change in cost formula, "cost of sales" decreased by \(\frac{4}{4},682\) million.

B) Other income, other expenses, finance income, finance costs, share of profit (loss) of entities accounted for using equity method, and income tax expense

#### Reclassification:

Of the items presented in "non-operating income," "non-operating expenses," "extraordinary income," and "extraordinary losses" under J-GAAP, those concerning profit or loss related to finance are reclassified into "finance income" and "finance costs," while all other items into "other income," "other expenses," and "share of profit (loss) of entities accounted for using equity method" under IFRS. Meanwhile, "income taxes – current," and "income taxes – deferred" that were separately presented under J-GAAP are now wholly presented in "income tax expense" under IFRS.

### Recognition and measurement:

#### [Finance costs]

Following the repayment of borrowings, expenses associated with such borrowings were amortized at once, resulting in \(\frac{4}{2}\),309 million increase in "finance costs."

# C) Other comprehensive income, net of tax

#### Recognition and measurement:

[Financial assets measured at fair value through other comprehensive income]

Financial instruments such as unlisted shares considered to pose extreme difficulty in determining fair value were recognized at cost under J-GAAP, whereas fair value of such financial instruments is estimated by using appropriate valuation techniques under IFRS, resulting in \(\frac{\pmathbf{1}}{1}\),563 million decrease in "financial assets measured at fair value through other comprehensive income."

# [Remeasurements of defined benefit plans]

Actuarial gains and losses under J-GAAP were recognized in "other comprehensive income" at the time of occurrence, and then were evenly amortized over the period within the average remaining years of service of the eligible employees from the fiscal year following such occurrence, whereas under IFRS, actuarial gains and losses are recognized in "other comprehensive income" at the time of occurrence, and then immediately recognized in "retained earnings," resulting in \mathbb{X}313 million decrease in "remeasurements of defined benefit plans."

# [Cash flow hedges]

Derivatives that met the hedge accounting requirements were recognized by deferred hedge accounting under J-GAAP, whereas some of such derivatives are subjected to fair value hedge accounting under IFRS, resulting in ¥585 million increase in "cash flow hedges."

### Reconciliation to cash flows for the previous fiscal year (from April 1, 2017 to March 31, 2018)

There is no material difference between the Consolidated Statement of Cash Flows disclosed under J-GAAP and that under IFRS.

# 3. Supplementary Information

# Notes:

- 1. The Company mainly engages in project production for these major products because the ratio of build-to-order production is low.
- 2. Nickel above includes ferronickel.
