\*1 The consolidated financial results for the year ended March 31, 2021 (FY2021) includes the profit on sale of all interest held in the Sierra Gorda Copper Mine in the Republic of Chile. However, the profit on sale of the Sierra Gorda includes an amount equal to a reversal of the allowance for bad debt for loans and other receivables for Sierra Gorda S.C.M., which was adjusted in the opening balance of retained earnings in FY2019 as a cumulative effect (Revised IAS 28 "Investments in Associates and Joint Ventures"), and this effect caused by the application of accounting procedures is omitted from the above dividend forecast calculation. Therefore, the profit attributable to owners of parent per share excluding the effect caused by the application of accounting procedures is to be ¥857.47.
